## COLOR TRENDS OF 2022

The colors in our homes can be a powerful communication tool not only to those who visit our homes, but it can also influence our mood and even our physiological reactions to the colors.

***“Everywhere we look,  
colors surround us.  
They are significant  
parts of our lives.”***

The Trend Colors we see for 2022 are closely aligned with the life that everyone is living. **The buzz words are Well-being, Verdure, Expedition and Wired.** These words are driving our lives and home decor trends.

COLOR

1

# Well-being

The Well-being trend is filled with many soft colors. It has clarity or a spa-like feel. That is why many people have turned parts of their homes into almost a kind of spa. Maybe they are now afraid to go out to the gym or to another public space, so instead, they are bringing well-being and wellness into their own home.

[Read More](#)

COLOR

3

# Expedition

Expedition home decor trend is all about going outdoors and exploring the world around you. It is about loading the children and the dog in a recreational vehicle and exploring nature.

[Read More](#)

COLOR

4

# Verdure

COLOR

2

Verdure home decor trend is about our desire to be surrounded by the outdoors or the lush green vegetation inside our homes. The Verdure trend also includes outdoor living spaces.

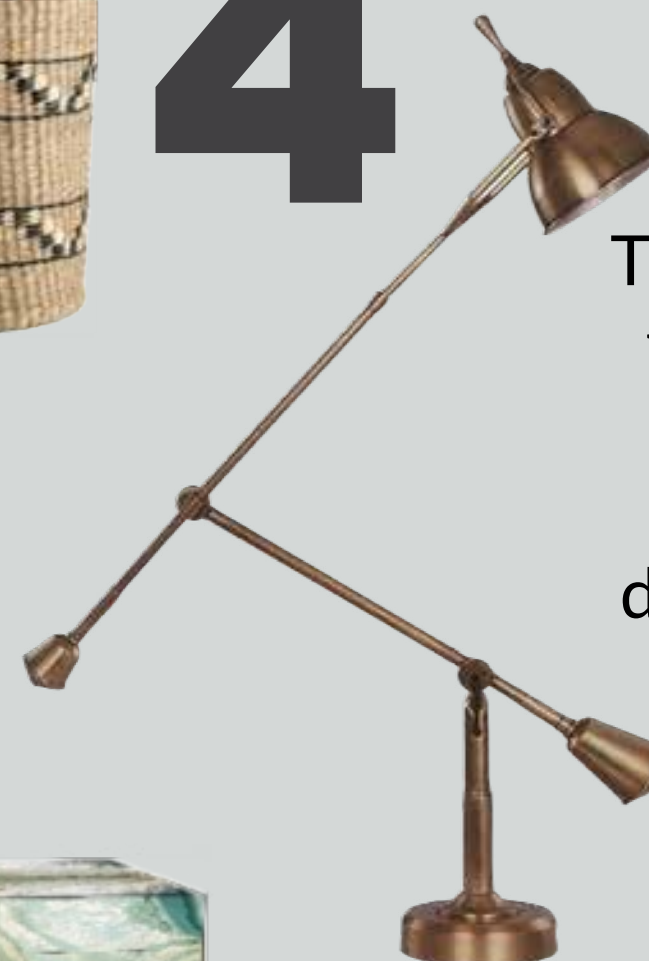

[Read More](#)

# Wired

The Wired trend offers the brightest colors in our color palette. The wired trend is a fresh direction for color that will continue.

# Basket Weaving Collections

Basket weaving is a 100% handmade product. Weaving a basket must all be done by hand and cannot be done effectively by machine.

Basket weaving is a skill that usually does not require a high education to weave a basket. Because basket weaving does not require high education, this is an advantage in many places around the world where people may not have received all of the education they need to do other kinds of highly skilled work.
